David Peluola

Full-Stack Developer (Frontend Focus) | React · Next.js · TypeScript

hello@dpeluola.com · +234 816 215 9752 · dpeluola.com · github.com/Adeolu05 · LinkedIn · Remote (UTC+1)

SUMMARY

Full-stack developer who ships production products end to end. Sole developer of a live headless e-commerce platform for a US LLC (114+ products, Stripe and crypto payments), builder of 15+ client websites, an Android crypto wallet and open-source Zcash privacy tools. Fast, AI-native workflow with Claude Code and Cursor; BSc Software Engineering student (2024 - 2028).

EXPERIENCE

Lead Full-Stack Developer, Titan Forge LLC (US) · *Jun 2026 - Present · Remote*

- Sole developer of titanforge.art, a headless e-commerce platform (Next.js 14, TypeScript, WooCommerce via WPGraphQL) launched on schedule in Aug 2026.
- Built 114+ product catalog, 3-step checkout, Stripe and NOWPayments crypto payments, FedEx live rates and Google OAuth accounts synced to WooCommerce.
- Added an artist marketplace with royalties, affiliate coupon tracking and a full GA4 funnel; now building a non-custodial AI trading desk on Solana for the client.

Freelance Web Developer, Dpeluola · *2025 - Present · Remote*

- Shipped 15+ production websites across Web3, SaaS, e-commerce and church niches; repeat work through referrals and verified Google reviews.
- Building an e-commerce store (300 products at launch, scaling to 1,000) with variants, card payments, customer accounts and admin for a Lagos fashion retailer.

Developer, xPerp · *Oct 2026 - Present · Remote*

- Built a paper perpetuals trading platform and the @xPerpBot X bot that turns trade calls into copyable positions with live Pyth prices.

Volunteer Developer, VibeCode Africa · *Sep 2026 - Present · Remote*

- Shipped the pre-launch auth gate, sign-in rebuild, mobile nav and dark-mode audit on a bilingual React and Supabase tourism platform; mentored builders at the Oct 2026 Lagos Hangout.

SIWES Industrial Trainee, HiiT PLC · *Feb 2026 - Nov 2026*

- Industrial training in web development, focused on the Django framework.

SELECTED PROJECTS

- **NOID Wallet**: Android wallet for the Parano1d L1 (React Native, Expo, self-hosted node and API on a VPS); launched Oct 2026, open source.
- **Can I Shield? / Am I Linkable?**: open Zcash privacy tools, entered in Colosseum's Crypto World's Fair and ZECATHON 2026.
- **ui-styles**: paid Agent Skill and npm CLI with 18 UI style packs for Claude Code, Cursor and Codex (ui.dpeluola.com).
- **Safebot and Levia**: Telegram bots in TypeScript (grammY, Zod, Vitest) for exchange trading and crypto community management.
